EXPERIENCE

TD

Toronto, ON

Scrum Master, Wealth Management

March 2024 – Present

- Launched and coached four agile product teams within TD Wealth's Acquisition product group, supporting marketing and client acquisition initiatives responsible for ~\$100M in annual net asset growth.
- Reduced release cycle time by ~25–30% across four teams by improving backlog prioritization, restructuring Jira workflows, and implementing roadmap tracking and delivery documentation in Jira and Confluence.
- Improved sprint predictability and reduced rollover work by introducing structured story writing, backlog refinement practices, and end-to-end delivery tracking.
- Led quarterly PI planning sessions for 40+ stakeholders across four teams, aligning delivery plans and surfacing cross-team dependencies across Financial Planning, Insurance, and Private Banking initiatives.
- Enabled delivery of ~15 digital features annually and 2–3 production releases per quarter, supporting national acquisition campaigns and client-facing digital wealth advisory experiences.

Toronto, ON

Project Manager, Wealth Management

April 2022 – March 2024

- Delivered 3–4 concurrent enterprise technology initiatives totaling \$3M+ supporting regulatory modernization, advisor compensation systems, and wealth data platform enhancements.
- Directed cross-functional delivery teams across Canada and the U.S., coordinating engineering, data, finance, HR, and vendor partners to execute integrated delivery plans.
- Led delivery of a regulatory modernization program (OFI) impacting front-end and back-end systems, coordinating internal teams and vendors to meet strict year-end compliance deadlines.
- Managed discovery and planning for a \$700K vendor-supported variable compensation platform modernization, partnering with finance and vendor teams to define requirements and secure SOW approval.
- Oversaw a \$4M data platform enhancement program across four wealth systems, coordinating quarterly roadmap planning and delivery across multiple internal platforms.

Toronto, ON

Project Analyst, Wealth Management

April 2019 – April 2022

- Managed financial planning and resource forecasting for a \$20M+ enterprise data strategy portfolio spanning ~12 projects, supporting four project managers and a portfolio director.
- Produced monthly portfolio analytics and forecasts, informing hiring plans, initiative prioritization, and risk mitigation across enterprise data programs.
- Developed PMO governance artifacts, reporting dashboards, and executive steering committee presentations, supporting monthly executive reviews and ensuring compliance with enterprise delivery standards.

RBC

Toronto, ON

Project Coordinator, Finance IT

December 2019 – April 2022

- Supported delivery of data strategy initiatives by managing financial forecasts, tracking milestones, and maintaining PMO governance artifacts.
- Designed an intake workflow for the data modeling team, improving throughput and reducing manual effort while coordinating between technical teams and business stakeholders.
