Cloud & Platforms: Azure Fundamentals (in progress)

EXPERIENCE

TD

Toronto, ON

Scrum Master, Wealth Management

March 2024 – Present

- Launched and coached four agile product teams within TD Wealth's Acquisition product group by managing delivery of marketing and client acquisition initiatives responsible for ~\$100M in annual net asset growth.
- Reduced release cycle time by ~25–30% across four teams by improving backlog prioritization, restructuring Jira workflows, and implementing roadmap tracking and delivery documentation in Jira and Confluence.
- Improved sprint predictability and reduced rollover work by introducing structured story writing, backlog refinement practices, and end-to-end delivery tracking.
- Led quarterly PI planning sessions for 40+ stakeholders across four teams, aligning delivery plans and surfacing and unblocking cross-team dependencies and risks across Financial Planning, Insurance, and Private Banking initiatives.
- Enabled delivery of ~15 digital features annually and 2–3 production releases per quarter, supporting national acquisition campaigns and client-facing digital wealth advisory experiences.

Project Manager, Wealth Management

April 2022 – March 2024

- Delivered 3–4 concurrent enterprise technology initiatives totaling \$3M+ supporting regulatory modernization, advisor compensation systems, and wealth data platform enhancements.
- Directed cross-functional delivery teams across Canada and the U.S., coordinating engineering, data, finance, HR, and vendor partners to execute integrated delivery plans without direct management authority.
- Led delivery of a regulatory modernization program (OFI) impacting front-end and back-end systems, coordinating internal teams and vendors to meet strict year-end compliance deadlines.
- Managed discovery and planning for a \$700K vendor-supported variable compensation platform modernization, partnering with finance and vendor teams to define requirements and secure SOW approval.
- Owned roadmap of a \$4M data platform enhancement program across four wealth systems, coordinating quarterly roadmap planning and delivery across multiple internal platforms.

Project Analyst, Wealth Management

April 2019 – April 2022

- Owned financial planning and resource forecasting for a \$20M+ enterprise data strategy portfolio spanning ~12 projects, supporting four project managers and a portfolio director.
- Managed monthly portfolio analytics and forecasts, informing hiring plans, initiative prioritization, and risk mitigation across enterprise data programs.
- Developed PMO governance artifacts, reporting dashboards, and executive steering committee presentations, supporting monthly executive reviews and ensuring compliance with enterprise delivery standards.

RBC

Project Coordinator, Finance IT

Toronto, ON
December 2017 – April 2019

- Managed financial forecasting and milestone tracking across data strategy initiatives.
- Designed an intake workflow for the data modeling team, improving throughput and reducing manual effort while coordinating between technical teams and business stakeholders.
- Bridged technical and business stakeholders to clarify requirements, resolve ambiguity, and maintain delivery alignment across data strategy initiatives.
- Owned compliance reporting and PMO governance documentation, ensuring adherence to enterprise delivery standards across Finance IT programs.

EDUCATION

University of Utah, David Eccles School of Business

Master of Science in Information Systems

Salt Lake City, UT
December 2026

University of Toronto

Honors Bachelor of Science in Computer Science and Statistics

Toronto, ON
May 2016

VOLUNTEER

Make Salt Lake

Event Committee Chair

Salt Lake City, UT
January 2026 – July 2026

- Owned planning and execution of monthly makerspace programming, supporting multi-session events (4+ concurrent classes) with ~60+ attendees.
- Led biweekly planning meetings, aligning volunteers on timelines, logistics, and event delivery readiness across recurring programming.
- Managed on-site event operations and attendee experience, ensuring smooth coordination among volunteers and participants.
- Tracked schedules, resource needs, and execution readiness across upcoming events to support consistent program delivery.
